17%

Residents under the age of 65 are uninsured

63%

Children with disabilities live in households experiencing financial hardship

HOW WE'RE HELPING

United Way funded programs enroll residents in health care benefits, promote health and wellness, provide primary and mental health care, and offer out-of-school activities, respite care, and medically necessary equipment to children with special needs.

THE RESULTS WE'RE SEEING

8,451

Individuals accessed health care services and supports

Access to Care

92%

Individuals experienced improved health outcomes

100%

Children with special needs developed life skills

Special Needs

92%

Caregivers of children with special needs overall quality of life improved

Travis, Client of Palm Beach County Medical Society Services

“ At 37, I was diagnosed with a brain tumor. Despite a successful surgery, I still had some issues with my speech, headaches, and numbness in my face and hands. After losing my job, I was worried about having access to health services to prevent the tumor from recurring. My primary care physician referred me to Project Access for multiple specialists to continue treatment. I am completely indebted to all the doctors and Project Access. My life changed because of their support. ”

EMPOWERING HEALTHY LIVES GOAL:

Help uninsured and underinsured residents access health insurance and services, and enhance the quality of life for children with disabilities.
